Orange22 got an early start in the furniture design business. As early as 1995 furniture manufacturing clients turned to Orange22 for cutting edge design innovations and trend setting creativity. Now with over 10 years of furniture design experience for a range of markets, global and domestic, Orange22 pushes to deliver the best in design with cost savings and smart engineering. Minimal material waste, easy of assembly, and reduction of sku's per product family are just a few of our trademarks. We understand the business and deliver more than just jaw dropping design. We help furniture manufactures reach their maximum potential.

"...designs unfold like environmental narratives."
